#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments, filed on 12/14/05, with respect to the rejection(s) of claim(s) 1, 4, and 5 under the reference Moses (US 6,122,948) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the reference Dickson, Jr. (US 6,247,346) as set below.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The language in claim 4 is confusing since it states that "said step b) includes swaging the multi-wall thickness section into a generally frustroconical shape"; however, there is no "the multi-wall thickness section" mentioning in step b) of claim 1.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1, 4 (as best understood), and 5 are rejected under 35 U.S.C. 102(a) as being anticipated by Dickson, Jr. (US 6,247,346).

Dickson, Jr. discloses that it is old and well known to form an axle assembly comprising the steps of:

providing a cylindrical hollow member having an end portion;  
forming the end portion to provide a first generally circular end;  
forming a section of the cylindrical hollow member into a multi-wall thickness section; and

welding a preformed kingpin boss (note that the Examiner is interpreting "universal joint yokes" and/or "other types of fastening" as a preformed kingpin boss) to the generally circular end.

Dickson, Jr. further discloses that it is old and well known to swage the multi-wall thickness section into a generally frustroconical shape and to swage the hollow member into a generally polygonal cross-section.

#### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1, 4, and 5 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***
